

**IN THE CLAIMS:**

**Please amend Claims so as to read as follows:**

1. (Canceled, without prejudice)
2. (Canceled, without prejudice)
3. (Canceled, without prejudice)
4. (Canceled, without prejudice)
5. (Canceled, without prejudice)
6. (Canceled, without prejudice)
7. (Canceled, without prejudice)
8. (Canceled, without prejudice)
9. (Canceled, without prejudice)

10. Canceled, without prejudice.

11. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data  
stored in the storage means on the data display means,  
characterized in that:

a remark display control means is provided for visually  
displaying a visual confirmation guide for distinguishing a  
specified area of data being displayed on the display means,  
in that:

the remark display control means moves and displays the  
visual confirmation guide,

and in that:

the remark display control means moves the visual  
confirmation guide at a speed based on a complexity of a  
character ~~or characters or complexity of image data~~ being  
displayed by the visual confirmation guide.

12. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the  
data stored in the storage means on the display means,  
characterized in that:

a remark display control means is provided for visually  
displaying a visual confirmation guide for distinguishing a  
specified area of data being displayed on the display means,  
in that:

the remark display control means moves and displays the  
visual confirmation guide,

and in that:

the remark display control means moves the visual  
confirmation guide at a speed based on a frequency of a  
character ~~or characters or frequency of image~~ data being  
displayed by the visual confirmation guide.

13. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means, in that:

the remark display control means moves and displays the visual confirmation guide,

and in that:

the remark display control means moves the visual confirmation guide at a speed based on a combination of a complexity of a character ~~or characters or complexity of image data~~ being displayed with a frequency of a character ~~or characters or frequency of image data~~ being displayed by the visual confirmation guide.

14. (Canceled, without prejudice)

15. (Currently Amended) A data storage medium containing a record of a data display program readable by a computer to realize:  
a function for displaying a visual confirmation guide using a difference in visibility,  
a function for distinguishing displayed data by the displayed visual confirmation guide visually, and  
a function for moving or deforming the visual confirmation guide at a speed based on a compexity of a character ~~or characters or complexity of image data~~ being displayed thereby and/or a frequency of a character ~~or characters or frequency of image data~~ being displayed thereby so as to make the data displayed thereby easier to read.

16. (Canceled, without prejudice)

17. (Canceled, without prejudice)

18. (Canceled, without prejudice)

19. (Canceled, without prejudice)

20. (Canceled, without prejudice)

22. (Canceled, without prejudice)

23. (Canceled, without prejudice)

24. (Canceled, without prejudice)

25. (Canceled, without prejudice)

26. (Canceled, without prejudice)

27. (Canceled, without prejudice)

28. (Canceled, without prejudice)

29. (Canceled, without prejudice)

30. (Canceled, without prejudice)

31. (Canceled, without prejudice)

32. (Canceled, without prejudice)

33. (Canceled, without prejudice)

34. (Canceled, without prejudice)

35. (Canceled, without prejudice)

36. (Canceled, without prejudice)

37. (Canceled, without prejudice)

38. (Canceled, without prejudice)

39. (Canceled, without prejudice)

40. (Canceled, without prejudice)

41. (Canceled, without prejudice)

42. (Canceled, without prejudice)

43. (Canceled, without prejudice)

44. (Canceled, without prejudice)

45. (Canceled, without prejudice)

46. (Canceled, without prejudice)

47. (Canceled, without prejudice)

48. (Canceled, without prejudice)

49. (Canceled, without prejudice)

50. (Canceled, without prejudice)

51. (Canceled, without prejudice)

52. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of  
the data stored in the storage means on the data  
display means, characterized in that:

a remark display control means is provided for  
visually displaying a visual confirmation  
guided for distinguishing a specified area of  
data being displayed on the display means,

in that:

the remark display control means visually  
distinguishes the data being displayed with  
the visual confirmation guide from the data  
being displayed by said specified area of the  
display means by deforming the data being  
displayed by said specified area of the display  
means or adding information thereto and  
thereafter displaying the distinguished data  
with the visual confirmation guide,

in that:

the remark display control means moves and  
displays the visual confirmation guide,

and in that:

the remark display control means moves or  
deforms the visual confirmation guide at a  
speed based on a complexity of a character or  
~~characters or complexity of image data~~ being  
displayed by the visual confirmation guide.

53. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the  
data stored in the storage means on the data display  
means,

characterized in that:

a remark display control means is provided for visually  
displaying a visual confirmation guide for  
distinguishing a specified area of data being  
displayed on the display means,

in that:

the remark display control means deforms and displays the  
visual confirmation guide,

and in that:

the remark display control means deforms the  
visual confirmation guide at a speed based on a  
complexity of a character ~~or characters or the~~  
~~complexity of image data~~ being displayed by the  
visual confirmation guide.

54.(Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means.

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means deforms and displays the visual confirmation guide,

and in that:

the remark display control means deforms the visual confirmation guide at a speed based on a complexity of a character or characters or the complexity of image data being displayed by the visual confirmation guide.

55.(Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means,

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means moves and displays the visual conformation guide,

and in that:

the remark display control means moves or deforms the visual confirmation guide at a speed based on the frequency of a character or characters or frequency of image data being displayed by the visual confirmation guide.

56. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the  
data stored in the storage means on the data display  
means,

characterized in that:

a remark display control means is provided for visually  
displaying a visual confirmation guide for  
distinguishing a specified area of data being  
displayed on the display means,

in that:

the remark display control means deforms and displays  
the visual confirmation guide,

and in that:

the remark display control means deforms the visual  
confirmation guide at a speed based on a frequency of a  
~~character or characters or the frequency of image data~~  
being displayed by the visual confirmation guide.

57. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means.

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means deforms and displays the visual confirmation guide,

and in that:

the remark display control means deforms the visual confirmation guide at a speed based on a frequency of a character ~~or characters or the frequency of image data~~ being displayed by the visual confirmation guide.

58. (Currently Amended) A data\_displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means,

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means moves and displays the visual conformation guide,

and in that:

the remark display control means moves or deforms the visual confirmation guide at a speed based on a combination of a complexity of a character or ~~characters or a frequency of image data~~ being displayed by the visual confirmation guide with a frequency of a character or ~~characters or the frequency of image data~~ being displayed by the visual confirmation guide.

59. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the  
data stored in the storage means on the data display  
means,

characterized in that:

a remark display control means is provided for visually  
displaying a visual confirmation guide for  
distinguishing a specified area of data being  
displayed on the display means,

in that:

the remark display control means deforms and displays  
the visual confirmation guide,

and in that:

the remark display control means deforms the  
visual confirmation guide at a speed based on a  
combination of a complexity of a character ~~or~~  
~~characters or a frequency of image data~~ being  
displayed by the visual confirmation guide with a  
frequency of a character ~~or characters or the~~  
~~frequency of image data~~ being displayed by the visual  
confirmation guide.

60. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means.

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means deforms and displays the visual confirmation guide,

and in that:

the remark display control means deforms the visual confirmation guide at a speed based on a combination of a complexity of a character or ~~characters or a frequency of image data~~ being displayed by the visual confirmation guide with the frequency of a character or ~~characters or the frequency of image data~~ being displayed by the visual confirmation guide.

61. (Canceled, without prejudice)

62. (Previously Presented) A data displaying device as defined in any one of Claims 11, 12, 13, 52, 53, 54, 55, 56, 57, 58, 59 or 60, further characterized in that:  
the remark display control means displays the visual confirmation guide superimposed on data being displayed on the display means.
